ONE STEP – SELF ETCHING PRIMER

Stock SEP Part 24008

425 g fill / 20 Oz. Aerosol Can

Description:

One Step is unique and convenient to use 'etch type' primer that provides excellent adhesion for additional top coats, primers, and sealers to metals. This product is compatible with all primer surfacers for spot repair and refinishing. Apply to steel, aluminum, and most metals. One Step is also great for etching and filing when needed.

Features:

- Fast drying,- as quick as 10-15 min
- Excellent sanding, if necessary.
- Strong adhesion to metals, and other substrates.
- Superior adhesion of primer surfacers and other topcoats to product.
- Provides superior adhesion and corrosion protection
- Great filling characteristics for a self-etch primer.
- Apply to:
 - Bare metal
 - Aluminum
- Great for sand through areas prior to painting
- Can be used over cured paint

Application Instructions:

1. Surface should be free of rust and scale.
2. Clean area to be primed with Sure Solve (BSS) or Low VOC Cleaner (LVAPC) removing all wax, grease, silicones, and contaminates.
3. Feather edge (sand) original finish. Do not use over fresh paint.
4. Vigorously shake can for 1-2 minute agitating material.
5. Apply medium wet coats to achieve coverage holding can 10 - 15 inches from surface.
6. Material can be top coated and/or sanded in as quick as 10-20 min. depending on film build, temperature, humidity and air flow. Thick film or cooler temperatures will require longer dry times. SEP needs to be thoroughly dry before top coating.

Touch Dry, Paintable and sandable (if needed) in as little as 10 – 20 minutes

Dry times and cure times depend on film build, temperature, humidity and air flow. Maximum adhesion is achieved at full cure.

Note: Avoid applying any materials on or near catalytic converters, mufflers due to extreme heat.
